

DECLARATION AND POWER OF ATTORNEY FOR U.S. REISSUE APPLICATION

As a below named inventor, I hereby declare that:

My residence, post office address and citizenship are as stated below next to my name.

I believe I am the original, first and sole inventor (if only one name is listed below) or an original, first and joint inventor (if more than one name is listed below) of the subject matter, which is claimed and for which a reissue is sought on the invention entitled

IRRIGATION METHOD

which is described and claimed in U.S. Patent No. 6,000,625, issued on December 14, 1999 from application serial number 09/099,218, filed June 18, 1998.

I hereby state that I have reviewed and understand the contents of the above-identified patent, including the claims.

I believe the patent to be wholly or partly inoperative by reason of the patentee claiming less than he had a right to claim in the patent. Specifically, the patented invention is directed to:

A method of irrigating a crop area of at least 1000 m² by pumping water through feed ducting and a mixing zone to a spray manifold supplying one or more spraying devices by which the water is sprayed onto the crop area and in which a substantially stable dispersion in a liquid of water soluble polymer particles is metered at a predetermined rate of 0.5 to 30 ppm into the water at or before the mixing zone and the polymer particles are substantially dissolved into the water before the water is sprayed from the spraying devices.

I seek to correct claim 1 to read:

A method of irrigating a crop area of at least 1000 m² by pumping water through feed ducting and a mixing zone to a spray manifold supplying one or more spraying devices by which the water is sprayed onto the crop area and in which a substantially stable

dispersion in a liquid of water soluble polymer particles is metered at a predetermined rate of 0.5 to ~~30~~50 ppm into the water at or before the mixing zone and the polymer particles are substantially dissolved into the water before the water is sprayed from the spraying devices.

Support for the amendment is found in column 5, lines 9-15 of the issued patent. I believe that the error arose without deceptive intent on the part of Applicants. I believe that the error arose due to the failure of the attorney to appreciate the full scope of the invention. The amendment broadens the scope of claim 1 as the concentration of polymer has been increased. The request for reissue has been filed within two years of the issue date (December 14, 1999).

I acknowledge the duty to disclose all information, which is known by me to be material to the patentability of this application as defined in 37 C.F.R. § 1.56.

I hereby claim the benefit under 35 USC § 119(e) of any United States provisional application(s) listed below:
